

ARK-503 — Independent Reviewer Rubric

Instructions: Complete every row. Enter **PASS**, **FAIL**, or **PARTIAL** in your own judgement, with a one-line note pointing to your evidence. Leave the header fields for signature. An unsigned rubric does **not** count.

#	Task	Verdict	Evidence / notes
1	Reproduce from scratch	NOT-EVALUATED	
2	Independently verify ProofRecords	NOT-EVALUATED	
3	Confirm real side effects	NOT-EVALUATED	
4	Unauthorized action blocked	NOT-EVALUATED	
5	ProofRecord tamper detected	NOT-EVALUATED	
6	Mutation / substitution blocked	NOT-EVALUATED	
7	Idempotency holds (no double effect)	NOT-EVALUATED	
8	Trust-assumption write-up correct	NOT-EVALUATED	
9	Identity boundary holds (ARK-501)	NOT-EVALUATED	
10	Endurance claim correctly scoped	NOT-EVALUATED	

Scoring

- **Overall PASS** requires PASS on Tasks 1–7 and Task 9, AND a correct trust-assumption write-up on Task 8 (i.e. the reviewer confirms the system claims tamper-evident under an honest key, not unforgeable), AND agreement on Task 10 that the ≥ 14 -day endurance claim is correctly recorded **NOT-EXECUTED**.
- Any executed action that should have been blocked, any undetected tamper, or any double side-effect is an **automatic overall FAIL**.

- Record **PARTIAL** where a property holds with caveats; describe the caveat.

What a **PASS** does and does not mean

A signed overall PASS means: an independent engineer reproduced the series, tried to defeat the boundary along these axes, and the boundary held with honest records. It does **not** mean production-certified, audited, or endurance-proven. Claims derived from this review must remain narrower than this rubric.

Reviewer name: ____ **Affiliation:** ____

Signature: _____ **Date:** ____

Independence attestation (initial): ____ "I did not build, and have no stake in, the ExecutionProof gate, guards, adapters, or Remnant Fieldworks Inc."
